

لو الطالب مش متسجل

```
res_ex={
    "action" : "failed",
    "to": "proffessor",
    "from" : "student",
    "student_name":msg["student_name"],
    "device_id" : device_ID,
    "execute" : {    "student_id" : studend_id,
                     "device_id": device_ID,
                     "student_name" : msg["student_name"],
                     "cause" : "not in data base"
                   }
}
```

لو الطالب متسجل وهو فعلا

```
if(get_stud_name == msg["student_name"]):
    res_ex={
        "action" : "done",
        "to": "proffessor",
        "from" : "student",
        "student_name": get_stud_name,
        "device_id" : device_ID,
        "execute" : {    "student_id" : studend_id,
                         "device_id": device_ID,
                         "student_name" : get_stud_name
                       }
    }
```

لو الطالب متسجل بس مش هو المطلوب

```
res_ex={
    "action" : "failed",
    "to": "proffessor",
    "from" : "student",
    "student_name": get_stud_name,
    "device_id" : device_ID,
    "execute" : {    "student_id" : studend_id,
                     "device_id": device_ID,
                     "student_name" : get_stud_name,
                     "cause" : "another student"
                   }
}
```
